

Colloquium Schedule

Fall Semester 2017 (Version 1.5)

Fridays at 3:30 pm in Room 103 Schlundt unless otherwise noted

(Updated on August 10, 2017)

DATE	SPEAKER	TITLE	HOST
August 25	Dr. David Herbert, University of Manitoba	Chemical and Electronic 'Non-Innocence' in pi-Extended Aromatic N-Heterocycles: Phenanthridine as Catalyst and Ligand	Walensky
September 1	Dr. Steven Bockhold and Dr. Brian Huesgan, Carboline	Industrious Uses for a Graduate Degree in Chemistry: Experiences and Perspectives	Adams/Keller
September 8	Dr. Brandi Schottel, NSF	From Chemistry to Science Policy, and the Development of Critical Interdisciplinary Research	Harmata
September 15	Dr. Ryan Trovitch, Arizona State University	Donor-Functionalized Bis(imino)pyridine Ligands for Manganese- and Molybdenum-Based Catalysis	Bernskötter
September 22	Dr. Mathew Bogyo, Stanford University School of Medicine	Small Molecule Probes for Imaging Cancer and Infectious Diseases	Glass
September 29	Dr. Sara Skrabalak, Indiana University	Function Follows Form? Synthesis and Application of Metal Nanostructures	Baker, G.
October 6	Dr. Daniel Neumark, University of California-Berkeley	Spectroscopy and Dynamics of Free Radicals, Clusters, and Transition States Using Slow Electron Velocity Map Imaging of Cryogenically Cooled Anions (cryo-SEVI)	Suits
October 13	Dr. Scott R. Daly, University of Iowa	Cooperative Small Molecule Reactivity with Diphosphine and Redox-Active Tetradentate Ligands	Walensky
October 20- Midwest Regional ACS Meeting- No Colloquium			
October 27	Dr. Kami Hull, University of Illinois-UC	Transition Metal-Catalyzed Amination and Amidation Reactions	Harmata
November 3	Dr. Wen Li, Wayne State University	Attosecond Electronic Dynamics	Suits
November 10	Open	Open	Open
November 17	Dr. Cynthia Burrows, The University of Utah (Thomas Lecture Series)	Finding Needles in DNA-Stacks: Challenges in Organic Chemistry for Sequencing for Rare Events in DNA	Gates
November 23-Thanksgiving Break-No Colloquium
